# Вступление:

[ItemsToken](#) is a BNB-based smart contract on the BEP-20 network.

[ITTK](#) is going to build an entire ecosystem related to in-game items under one roof.

Within this ecosystem, we will create [revolutionary solutions](#) , which will simplify the withdrawal of items from different games to our token or fiat.

This platform will have its [own exchanger](#) , which will allow you to exchange as quickly and safely as possible, moreover, with the lowest possible commission.

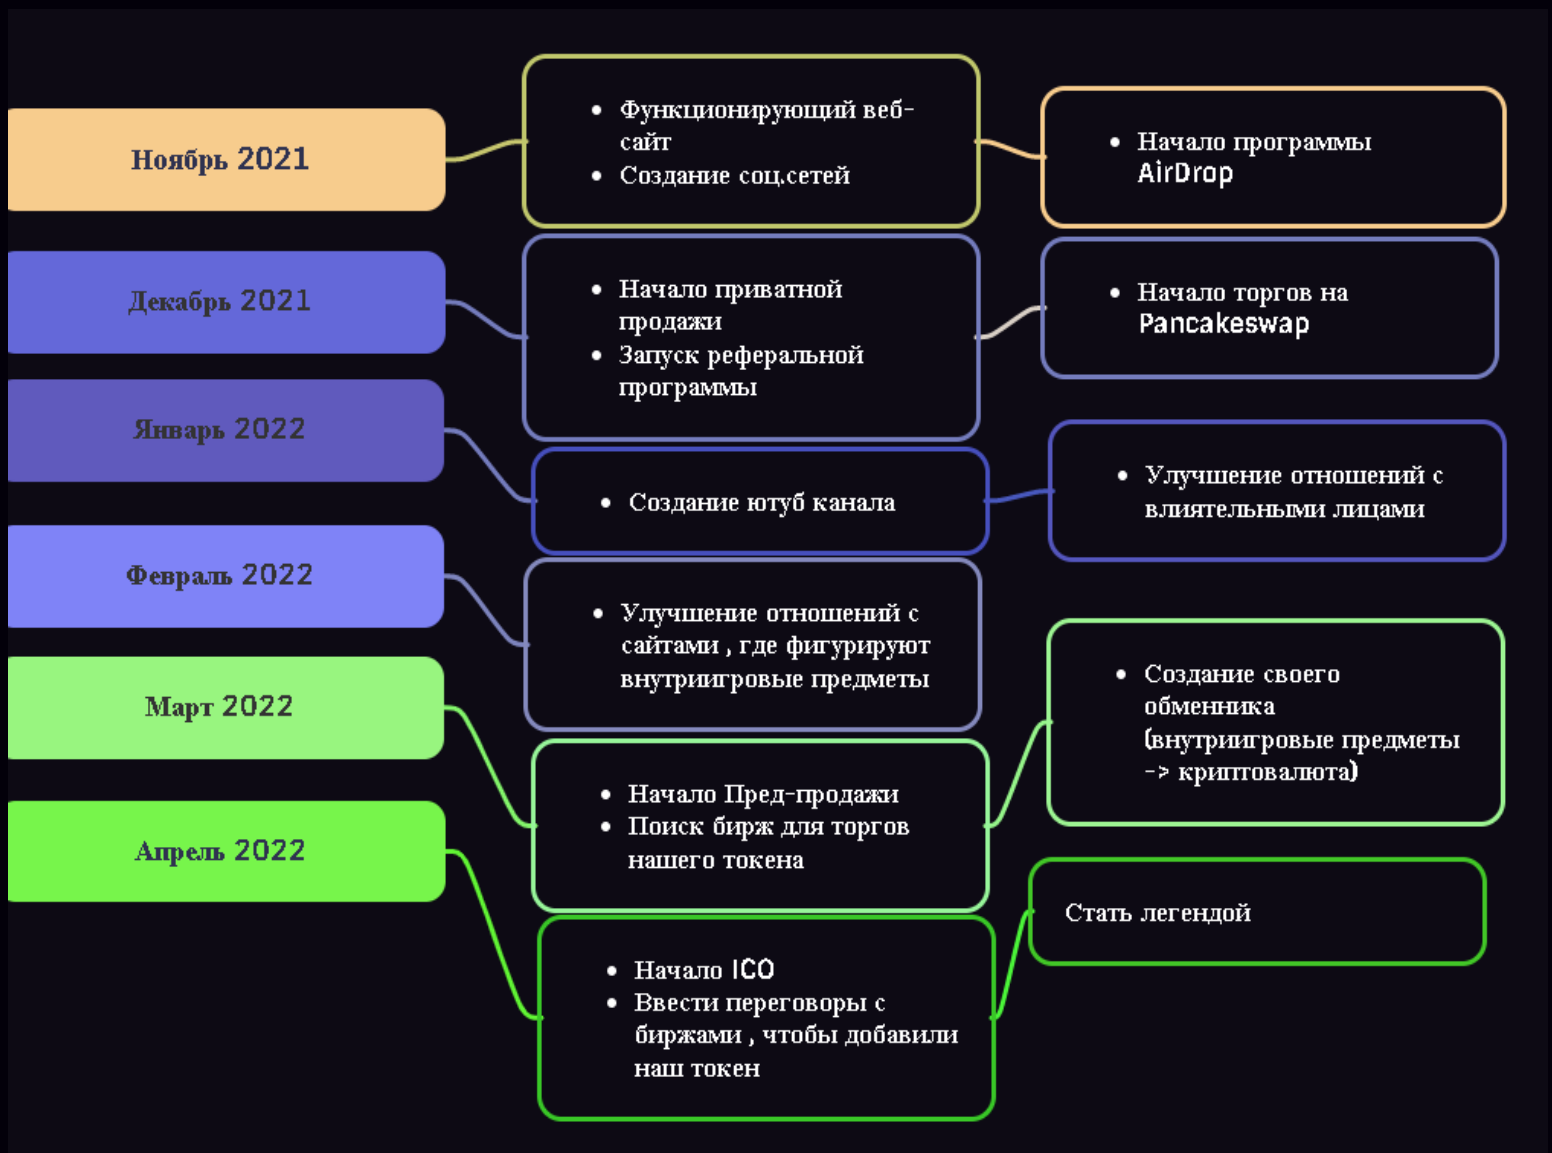

Other decisions will be made in the [interests of our community](#). All votes will be collected through social networks or a special form.

In order for us to succeed, we rely on you, our community, where everyone plays a big role, please be with us until the end.
